Mac OS: Mac OS X 10.11 (El Capitan). The latest version of the software is 4.0.2. [^1]: **Authors contributions.** CGRF, JG, MR, and VG designed the study. JG, VG, MR, and CGRF performed the research. CGRF, JG, MR, and VG analysed the data. CGRF, JG, MR, and VG wrote the paper. Q: Does the android:text of TextView have a property that could change color of a string? I have TextView with android:textColor property, and I would like to change color of a string inside. Is there a property that I could use to do so? Something like that: public class MyView extends View { public MyView(Context context) { super(context); } public MyView(Context context, AttributeSet attrs) { super(context, attrs); public MyView(Context context, AttributeSet attrs, int defStyle) { super(context, attrs, defStyle); @Override protected void onDraw(Canvas canvas) { // draw something // if some words inside TextView has the color property, I would like to change it int fontColor = Color.BLUE; int textColor = Color.RED; super.onDraw(canvas); } A: Yes, it's android:textColorHint. Use it like this: 82157476af
